# A-Type Poultry Cage System

The Rever California (A-Type Poultry Cage) System is a vertically stacked poultry housing solution primarily used in commercial layer houses, grower houses, and brooder houses. It's designed to maximize bird density while ensuring proper ventilation, hygiene, and ease of management.

## Types of Poultry Supported

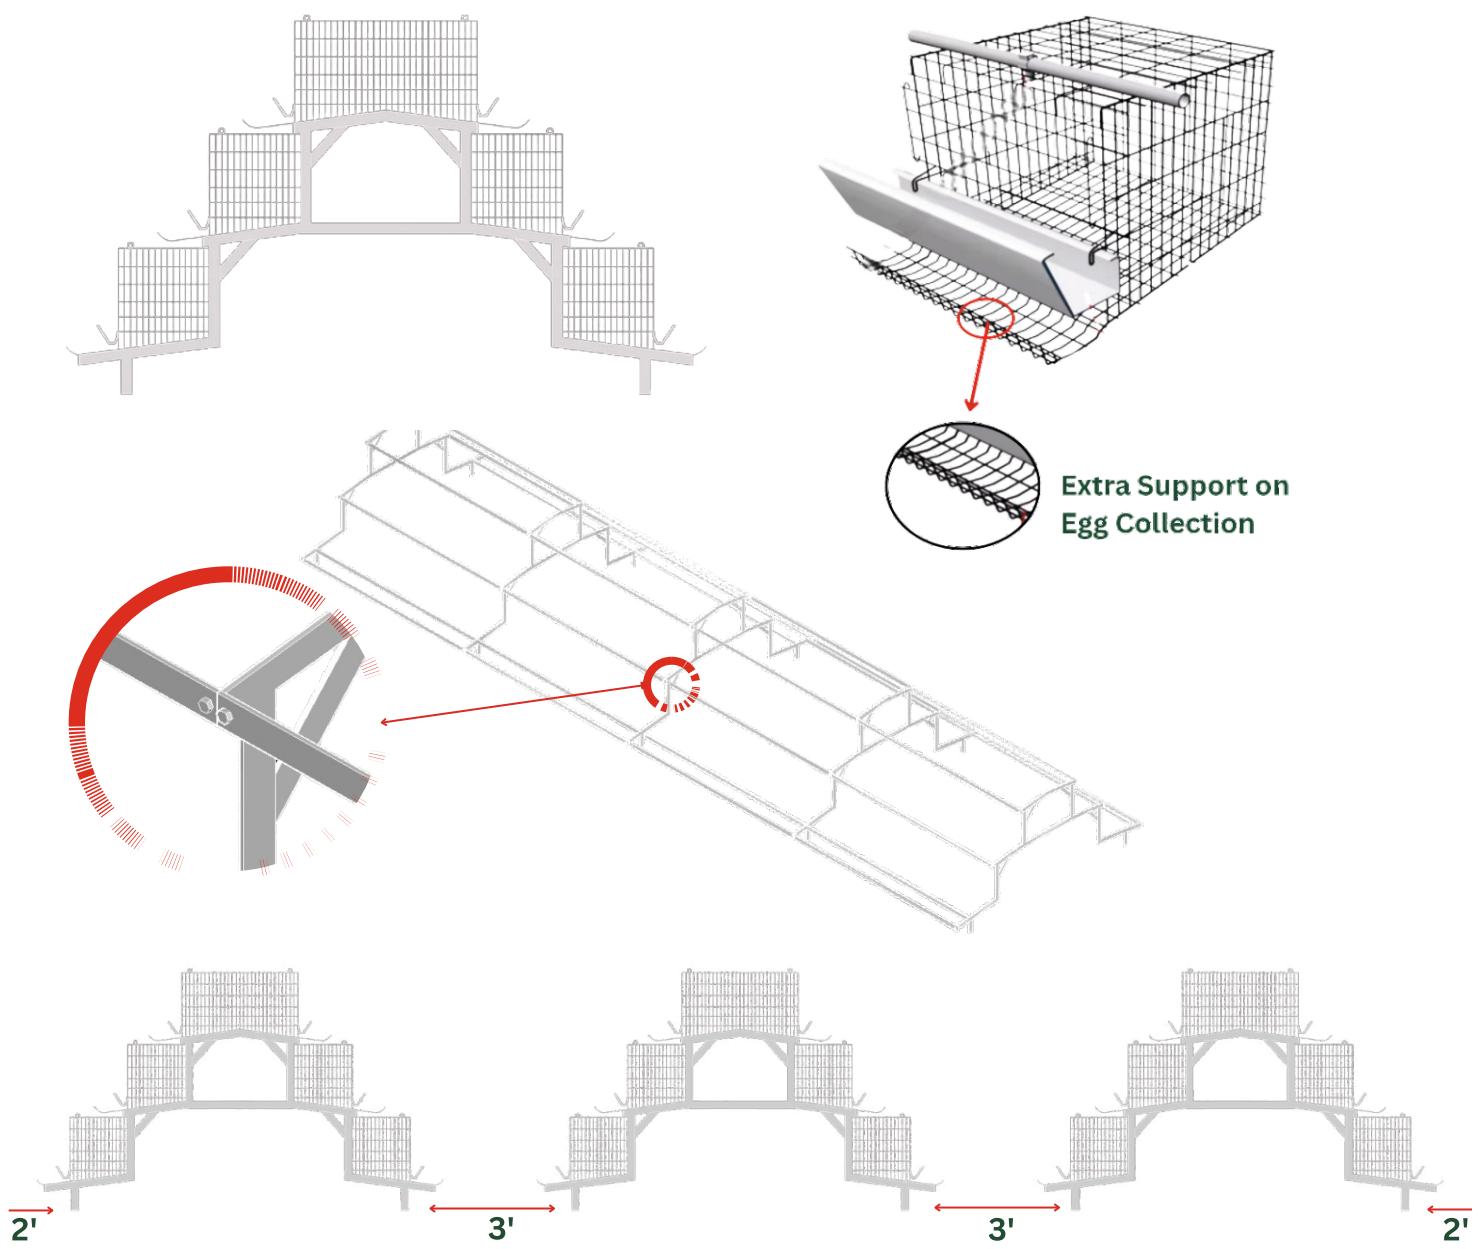

- **Layer Cage:** for the production of better commercial eggs with lower breakage.
- **Breeder Cage:** for the production of better & cleaner hatching eggs.

## Construction and Materials

- **Frame:** GI flat with corrosion-resistant coating, joint with nut-bolts
- **Cage Wire:** High-tensile TATA Wiron 275gsm wire for durability and resistance
- **Feed Troughs:** PVC plastic for rust resistance
- **Water Line:** PVC pipe fitted with nipple drinkers

## “A” Type Cage Layout Plan Diagram

## Features & Benefits

- **Space-efficient:** Multi-tiered design supports high bird density in minimal ground space.
- **Cost-effective:** Requires lower initial investment.
- **Good ventilation:** Open wire structure enhances airflow and reduces heat stress.
- **Easy management:** Streamlines feeding, watering, and egg collection.
- **Hygiene & health:** Improves disease control with individual cages and better manure management.

## Specification of cages

Sl No.	Type of Cages	Box Size (in inches) AxBxCxD	Birds/Box	Space/Bird (sqinch)
1	A type CL	20x18x15x18	4	67.5
2	A Type BCG	20x18x15x18	B9/G5	30/54
3	CL A Type Brooder	20x18x15x18	9	30
4	CL A Type Grower	20x18x15x18	5	54

**CL: Commercial Layer**

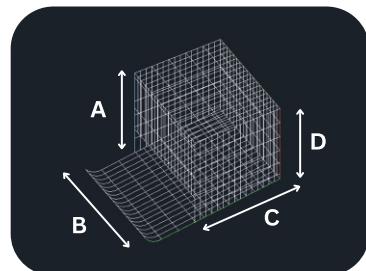

**BCG: Brooder Cum Growers**

**A: Box Front Height**

**B: Box Front Length**

**C: Box Depth**

**D: Box Back Height**
