COOLING & VENTILATION

Ventilation That Cares for Every Bird.

Our Services:

- ✓ Custom Ventilation System Design
- ✓ Climate Control Integration
- ✓ Energy Efficiency
- ✓ Optimal Climate Control

Precision Airflow, Perfect Environment

RIGHT CLIMATE, RIGHT GROWTH

Features

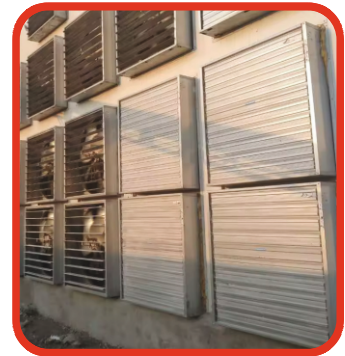

- High-efficiency exhaust fans with galvanized iron frame & steel blades
- Uniform air circulation for consistent cooling
- Durable cooling pads with high water retention capacity
- Smart climate controller compatibility for automatic regulation
- Low-noise operation for stress-free bird environment
- Corrosion-resistant design for long life
- Easy installation with minimal maintenance
- Stainless Steel system designed for longer life.
- Uniform water distribution ensured with an advanced rain-making system for the cooling pad.

Benefits

- Maintains **ideal temperature & humidity** for healthy bird growth
- Prevents heat stress, reducing the mortality rate
- Improves feed conversion ratio (FCR) and overall productivity
- Enhances air quality by removing dust, ammonia, and harmful gases
- Promotes better egg production & meat quality
- Increases energy savings with efficient design
