# V-06

## Compact & Smart Climate Control for Small-Medium Poultry Farms

### Key Features

- 6 relay outputs for fan and cooling pad control
- High-speed microcontroller
- RS485 communication for long-distance sensor accuracy
- Touchscreen display for clear and convenient data viewing.

### Advantages & Benefits

- Highly cost-effective climate control solution
- Accurate sensor readings even in large sheds
- Very easy to use—no technical skills required
- Maintains ideal environment → better growth & lower mortality
- Reliable electronics suitable for long-hour continuous operation

### Wi-Fi Feature

- A virtual keypad is provided for easy and accurate data input.
- View live temperature, humidity, fan status, and cooling pad status from anywhere
