CONTROL PANEL SYSTEM

Smart Power Management, Safe
Farms, Higher Efficiency.

Why Us?

- ✓ Smart Power Control
- ✓ Safe & Reliable Operation
- ✓ Efficient Load Management
- ✓ Farm-Ready Durable Design

**MAXIMUM ELECTRICAL
SAFETY & AUTOMATION**

**Increases farm productivity
& stability**

Ideal for operating:

Our **Poultry Control Panel System** is engineered to manage and protect all electrical operations inside poultry sheds. Designed with advanced protection features, heavy-duty components, and smart automation, it ensures uninterrupted working of fans, foggers, pumps, heaters, and other essential farm equipment.

Built for harsh farm environments, this panel minimizes breakdowns, reduces maintenance costs, and keeps your farm running smoothly and safely.

Suitable for all Poultry Farms:

- Broiler
- Layer
- Breeder
- Commercial & Automation-Based Farms

Main Control Panel (MCP)

- Heavy-duty panel for full shed automation.

Sub Control Panel (SCP)

- Distributed load management panel.

Phase Failure & Protection Unit

- Protects against voltage fluctuation.

Starter Panel

- For pumps, motors, and heavy loads.

Auto Changeover Unit

- Seamless switching between power sources.

Digital Load Monitor

- Real-time display for voltage, current & load.
